WELCOME

Thank you for choosing Tramigo

Download the Tramigo application from:

1

Download the Tramigo app to your mobile phone and **create** an account.

2

Select **"Add"** to add your new device, then **choose** Tramigo IQL-AT for device Type.

3

Scan or insert the **IMEI code** found on the side of your device.

4

Before using the device charge it using the **wireless charger**. Full battery requires **4-5 hours** of charging.

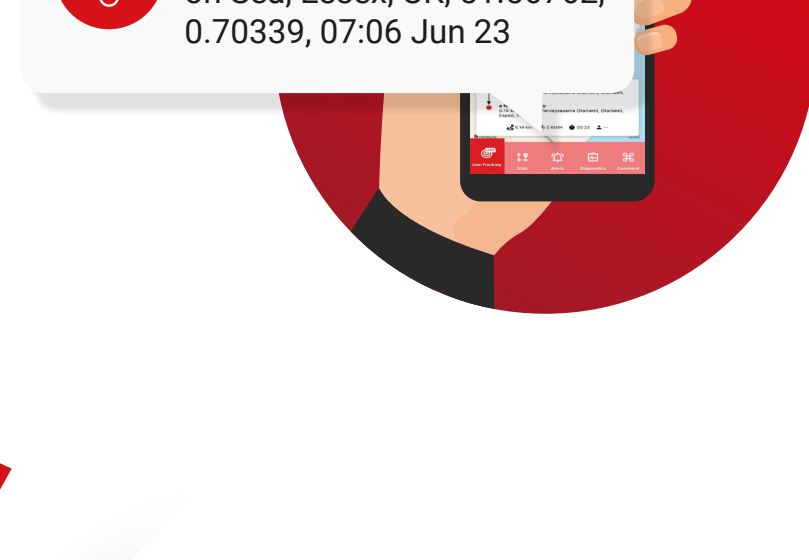

5

Default configuration of the device reporting is:

Not moving: every 120 minutes (12 messages per day).

Moving: every 10 minutes.

6

Once your device is charged, the device is **ready to track!**

No SIM card is required! The device comes with an embedded SIM card and unlimited data usage for the subscription period.

+

Additional controls:

Use TramigoApp to explore tracking features and alarms such as motion alarm, live tracking, geofence, and more.

Create geofences and get notified when the device exit or enters the chosen area.

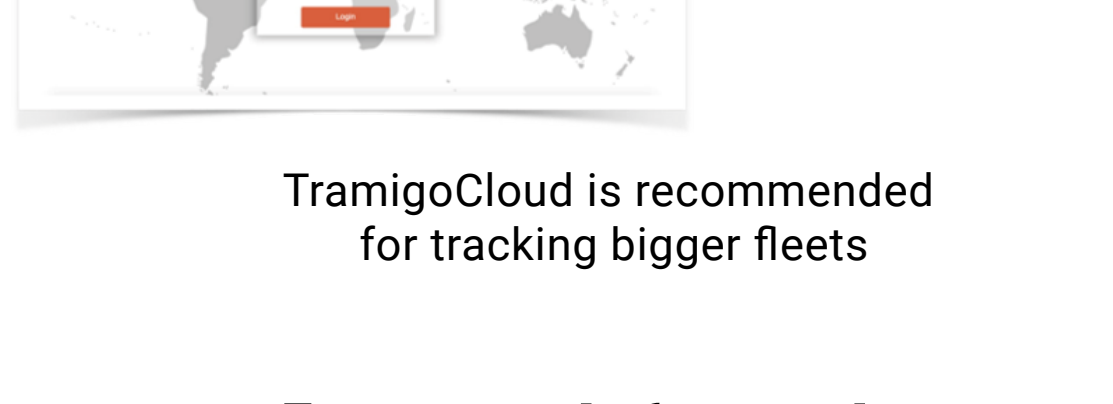

When the device battery is low and requires charging, you will get notified through the app, and the device will start vibrating.

+

The time it takes to discharge the battery varies depending on the reporting frequency. Example, the below table shows the battery life with different reporting frequencies.

Reporting frequency	Battery life in days
1 min	9 days
10 min	20 days
1hr	172 days
1 day	1 year

TramigoCloud is recommended for tracking bigger fleets
