TRAMIGO SOFTWARE

Tramigo offers software solutions which allows you to monitor your vehicles at your control center or from your mobile devices:

• TRAMIGOCLOUD

TramigoCloud allows you to track your fleet behind a secure web login and puts a full control center within your reach wherever you go. With centralised updates the latest features are always immediately available to all of our security focused customers. TramigoCloud is recommended for fleet management.

• TRAMIGOAPP

TramigoApp is an easy but secure way to track and monitor your vehicles anytime and anywhere. TramigoApp allows you to monitor and track your vehicles, staff, or family directly on your phone. Additional features includes trip reports, usage history reporting, geofence and setting alarms. Available for free on App Store and Google Play.

TECHNICAL DATA

GENERAL SPECIFICATION

Dimensions	87 x 51 x 30mm
Weight	150g
Backup battery	Li-Polymer 3.7V/2400 mAh
Charging method	Wireless charger
Standby time	Standby current: <math><50 \mu\text{A}</math> 1 report per day: 1 year
Waterproof	IP67 compliant
Operating temperature	-30°C~+60°C
Command set	@Track protocol command

AIR INTERFACE PROTOCOL

Transmit protocol	TCP, UDP, SMS
Working modes	Power saving mode for long standby time. Continuous mode for emergency tracking
Scheduled timing report	Report position and status at preset time intervals
Geo-fences	Support unlimited geo-fence through TramigoApp & TramigoCloud
Low power alarm	Alarm when internal battery is low
Wakeup report	Report when the device wakes up
Motion detection	Motion detection based on internal 3-axis accelerometer
Reporting frequency adjustment	Intelligent adjustment of reporting frequency
