ABOUT TRAMIGO

Tramigo is a global leader in IoT GPS tracking, PTT communication, and embedded connectivity solutions. Founded in 2000 and headquartered in Finland, Tramigo operates through a strong network of resellers, distributor partners, and local offices, ensuring lifetime support and accessibility worldwide.

All of Tramigo's solutions are designed and developed in-house. Its offerings include advanced vehicle and asset tracking, Push-To-Talk communication, AI-powered video telematics, using eSIM multi-network connectivity. With 25 years of expertise, Tramigo helps businesses and governments enhance operations, improve security, and maintain reliable communication in even the most challenging conditions.

CORE PHILOSOPHY

At Tramigo, we believe in empowering businesses and individuals to thrive in a connected world. **Our philosophy is built on three pillars:**

INNOVATION

Constantly pushing the boundaries of technology to deliver smarter, faster, and more efficient solutions.

QUALITY

Ensuring every solution and service meets the highest standards of performance and reliability.

PARTNERSHIP

Building long-term relationships with our customers and partners through trust, transparency, and tailored support.

WHY CHOOSE TRAMIGO?

- 01 Innovative technology**
Industry-first solutions like eSIM multi-network connectivity and AI-driven optimization set new standards in performance and reliability.
- 02 End-to-end solutions**
From hardware to software and support, Tramigo delivers a complete, customizable solution.
- 03 Global expertise**
With a worldwide presence and solutions for diverse industries, Tramigo offers unmatched scalability and support.
- 04 Proven reliability**
Trusted by businesses and governments globally, Tramigo solutions are built for durability, accuracy, and security.
- 05 Long-term value**
Our solutions are built to last with ongoing support, reducing costs while maximizing operational efficiency.

SOLUTIONS OVERVIEW

Tramigo delivers advanced solutions to help businesses and government organizations manage fleets, track assets, and maintain critical communications anywhere, anytime. All solutions are powered by Tramigo's robust multi-network connectivity, ensuring reliable operation even in challenging environments.

Whether you need to monitor vehicles and assets, improve driver safety, or enable secure team communication, Tramigo offers a complete suite of hardware, software, and connectivity designed for real-world demands. Our integrated approach helps organizations increase efficiency, enhance security, and stay connected at all times.

OEM VEHICLE TRACKING SOLUTIONS

Deliver vehicles ready for seamless tracking and advanced fleet management from the factory.

MISSION CRITICAL FLEET MANAGEMENT SOLUTIONS

Manage and secure diverse fleets and cargo with reliable tracking in any environment.

AI-POWERED VIDEO TELEMATICS SOLUTIONS

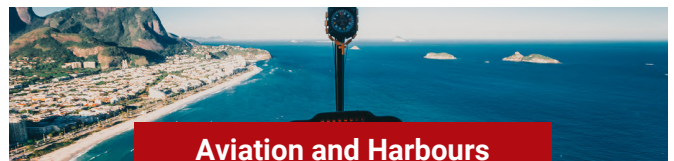

Monitor driver behavior, prevent incidents, and improve safety with intelligent video analytics.

MISSION CRITICAL PUSH-TO-TALK SOLUTIONS

Communicate instantly and securely with teams across nationwide and regional networks.

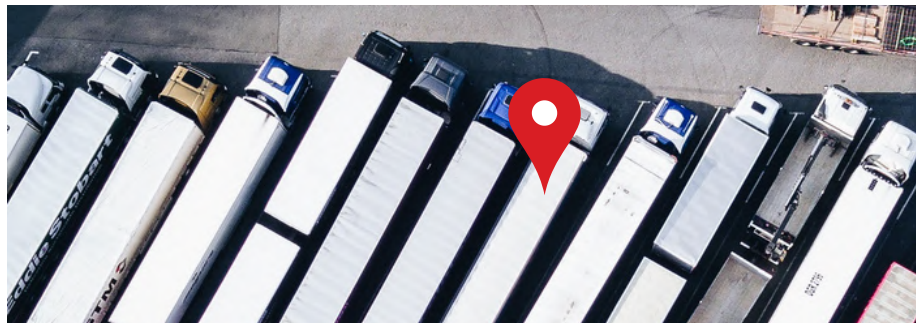

INDUSTRIES SERVED

TRAMIGO'S REFERENCES

GPS TRACKING AND FLEET MANAGEMENT

Tramigo gives you full control over your assets, vehicles, and operations with real-time visibility and comprehensive insights. Our GPS tracking and fleet management solution combines robust hardware, intuitive software, and reliable connectivity for seamless management and optimized efficiency.

TRAMIGO CLOUD

TramigoCloud delivers customers all the benefits of a top-end enterprise fleet management software system behind a secure web login. With constant centralized updates, the latest features are always immediately available to all of our security-focused customers.

TRAMIGO APP

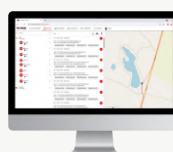

A convenient mobile tracking solution for private vehicles and SME fleets. Designed to be compatible with all Tramigo's hardware options. Whether you have a small or large fleet, or are looking to track vehicles for personal or business use..

TRAMIGO CLOUD LOCAL HOSTING

TramigoCloud offers a locally hosted vehicle tracking and fleet management solution for maximum privacy and security. Ideal for governments and military operations, it can be hosted on your private server or within your country's borders.

TRAMIGO CLOUD API

TramigoCloud's API allows seamless integration of real-time tracking data into your software. With secure API keys, you can easily access and customize your operations without leaving your preferred platform.

AI-POWERED DASHCAM SOLUTIONS

Tramigo's AI Dashcam solution enhances fleet safety with high-quality video surveillance and real-time data. Our AI-powered dashcams capture critical driving events, monitor driver behavior, and protect against fraud or accidents. With integrated GPS and telematics, fleet managers can review footage, analyze performance, and make data-driven decisions to improve safety and efficiency.

SOFTWARE SOLUTIONS

DASHCAM SOFTWARE

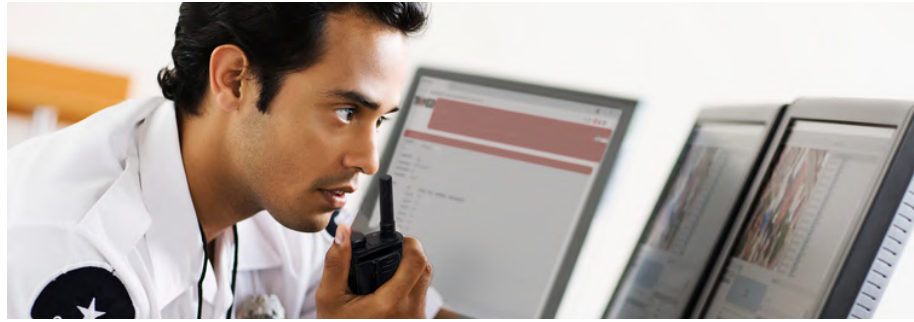

Tramigo Dashcam software offers real-time driver behavior monitoring and automated data collection. It provides timely alerts, detailed history footage, and in-depth analysis to improve fleet performance and driver habits for businesses of all sizes.

DASHCAM APP

Tramigo Dashcam App allows driver behavior monitoring and real-time alerts for critical events, all directly from a mobile phone. Video footage and reports are also easily accessible via the app.

PUSH-TO-TALK OVER CELLULAR COMPLETE SOLUTION

Tramigo's Push-to-Talk over Cellular (PTT) solution delivers secure, instant voice communication and real-time GPS tracking for teams of any size. Built on multi-network connectivity and strong AES-256 encryption, Tramigo's PTT ensures clear, reliable communication, making it ideal for businesses and organizations that need efficient, real-time coordination, from small teams to large-scale operations.

COMPLETE PTT SOLUTION

Tramigo's complete PTT solution consolidates hardware, user licenses, PTT software, and connectivity into a single offering. This approach eliminates vendor complexity while delivering a cost-effective solution.

PTT HARDWARE

Rugged durability, user-friendly design, and crystal-clear audio

USER LICENSE & WEB ADMIN INTERFACE

Centralized platform for user management and settings configuration

MULTI-NETWORK CONNECTIVITY

Comes with Tramigo eSIM multi-network connectivity and/or local plastic SIM option

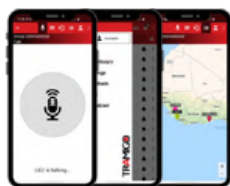

PTT SOFTWARE

Android-based high-performance PTT software

WINDOWS DISPATCHER AND MOBILE DISPATCHER

Tramigo's dispatcher software enables centralized, real-time management of field units for efficient control of operations from a single platform.

MOBILE DISPATCHER

Tramigo App-based Mobile Dispatcher

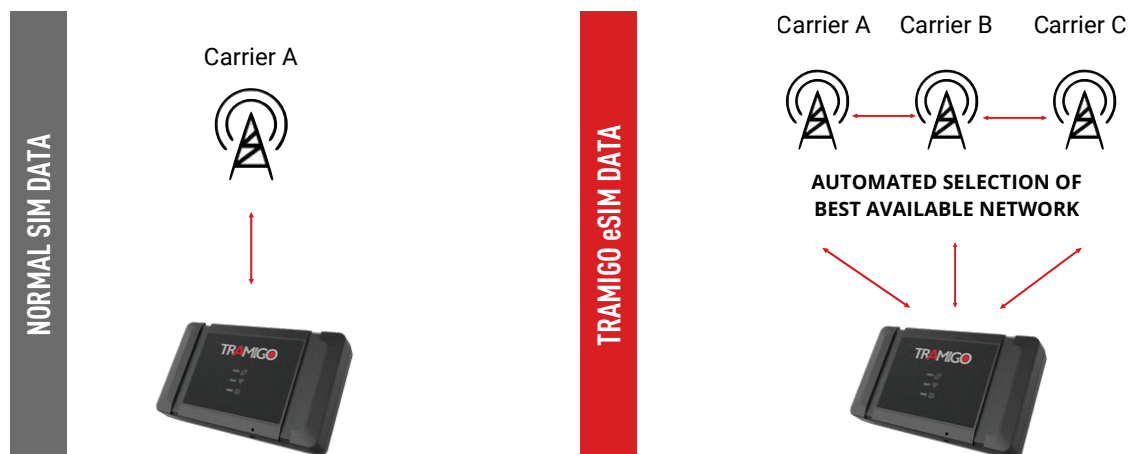

WINDOWS DISPATCHER

PC software for Command and Control Center

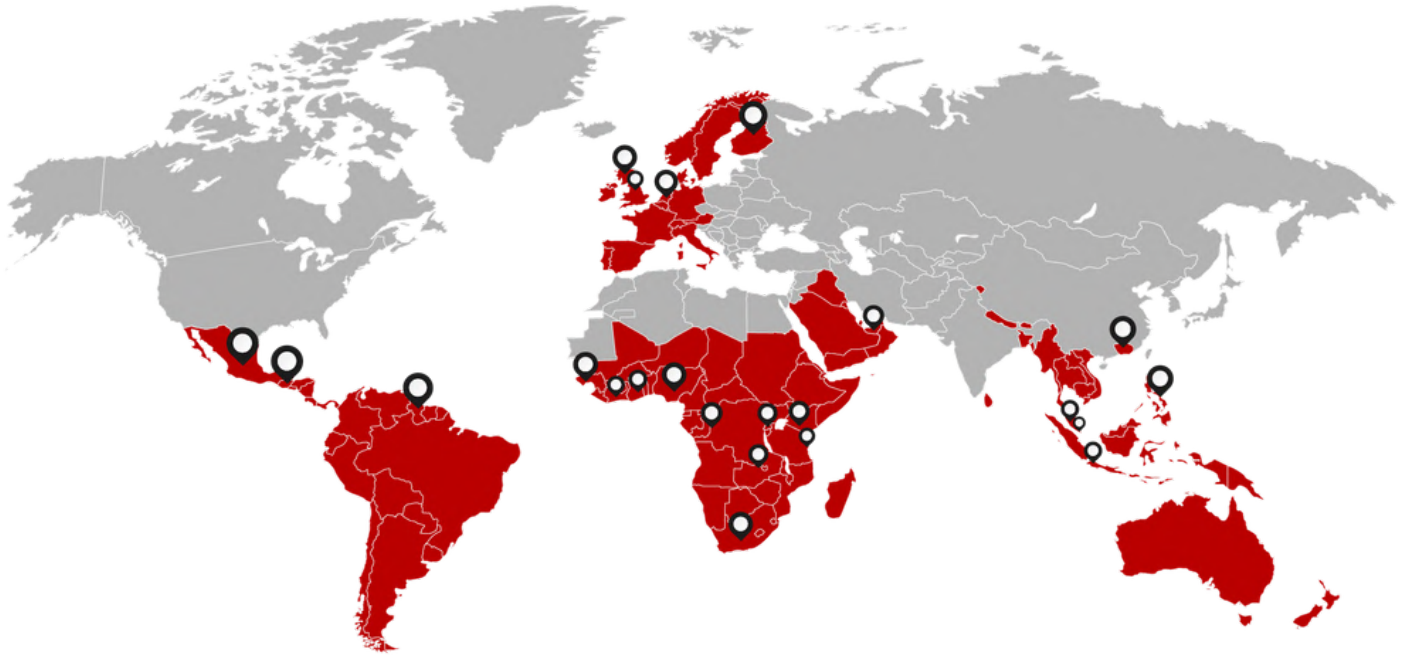

EMBEDDED MULTI-NETWORK CONNECTIVITY

Tramigo's embedded multi-network connectivity is designed to ensure that you, as a customer, can rely on the best possible connectivity, regardless of the country in which you operate.

For GPS tracking, fleet management, mission-critical communications, or AI-powered dashcams, Tramigo's solutions **always connect to the best available network**. This ensures optimal performance and minimal downtime, even when fleets cross borders or operate in remote areas. With automatic network selection, operations stay efficient, secure, and globally connected - without manual configuration or roaming fees.

WE ARE GLOBAL

YOUR SATISFACTION IS OUR PRIORITY.
LET US HELP YOU FIND THE BEST FIT.

STEP 1

CONTACT TRAMIGO

Communicate your business requirements and receive a proposal and quote, see if you qualify for financing.

STEP 2

INSTALLATION AND TRAINING

Tramigo specialists perform hardware installation, software setup and provide comprehensive onsite and online training and onboarding.

STEP 3

SUPPORT COMMITMENT

As a Tramigo customer, you are our partner with access to technical support and new solution development.
